Title Page, Keeping Them Alive. [Click to enlarge.](#)

For millions of years, this planet did well without agricultural chemicals. For roughly a single century (unfortunately, this one) we have done a lot of damage interfering with the natural processes. Nonetheless, in 1982, when *Keeping Them Alive* was published, the idea on tending to house plants without using chemicals was a novel idea.

The last 100 copies of this pioneering classic (now in its second printing) are being offered directly by the author and publisher. Years ahead of its time, *Keeping Them Alive* introduced thousands of readers around the globe to caring for houseplants without the use of chemicals. This may be your last opportunity to own a Canadian classic.

*Keeping Them Alive*  
will not be reprinted!
